Juan Víctor Gómez Sánchez

Senior Fullstack Developer

+6 years' experience as software engineer. Proficient in writing applications with Expressjs. Experienced in developing and maintaining Laravel-based applications, creating Vue components, and optimizing system performance. Skilled in RESTful API development. Committed to driving innovation and excellence in the development process.

MOST RECENT WORK EXPERIENCE

Senior Software Engineer at Wishpond

March 2022 - May 2023 [Vancouver Canada] [Marketing – B2B | B2C]

RESPONSIBILITIES

- Develop and maintain a SMS Shopify app using Laravel, enabling the recovery of cart abandonments.
- Create new ad rules for a SaaS platform to automate the management and display of ads across different ad platforms.
- Collaborate with two teams, creating an internal API to exchange internal information between systems.
- As the responsible party, deploy sprint deliveries and monitor AWS instances for seamless deployment.

KEY ACCOMPLISHMENTS

- Reduced the cost of the SMS api integration by refactoring the api calls.
- Enhanced team efficiency by optimizing the Docker development configuration.
- Achieved a 100% reduction in Shopify app installation errors by enhancing the installation process for Shopify app.

Lead Full Stack Developer at Webforce HQ

February 2020 - February 2022 [Austin Texas, U.S.] [Marketing – B2B]

RESPONSIBILITIES

- Mentor and lead an engineering team of 4 software engineers to create Vue components for a web editor.
- Designed and implemented RESTful APIs utilizing the Laravel framework to enhance the functionality of the CRM system.
- Develop web components for a web editor used for creating funnel pages, blogs, and online shops.
- Developed a versatile theme system for the web editor, optimizing it for effortless creation and customization of themes.
- Provided technical guidance and instruction to fellow developers on the architecture and implementation of the web editor.

KEY ACCOMPLISHMENTS

- Improved the generated bundle efficiency of the web editor by significantly reducing the need to update individual pages, resulting in a streamlined process and avoiding redundant updates.
- Simplified the development process by creating a script that assists developers in generating essential files for new components.
- Created an extensive collection of SVG animations specifically designed for integration into the web editor.

Jr Full Stack Web Developer at INIFECH

January 2014 - May 2016 - Tuxtla Gutiérrez, Chiapas, México

RESPONSIBILITIES

- Improved file uploads and implemented backup solutions using Node.js.
- Upgraded PHP version to enhance system performance and security.
- Developed new website modules using jQuery for improved user experience.

KEY ACCOMPLISHMENTS

- Successfully implemented file upload improvements, enhancing system reliability.
- Upgraded PHP version, resulting in improved website performance.
- Created and integrated new modules with jQuery to enhance website functionality.

Jr Full Stack Web Developer at Trazzos Web

August 2013 - January 2014 - Tuxtla Gutiérrez, Chiapas, México

RESPONSIBILITIES

- Utilized Prototype.js to develop interactive web interfaces.
- Created custom modules using jQuery to enhance website functionality.
- Successfully maintained three different systems using PHP and jQuery.

KEY ACCOMPLISHMENTS

- Demonstrated proficiency in Prototype.js for crafting engaging web interfaces.
- Developed and integrated jQuery modules to improve user experience.
- Ensured the smooth maintenance of three distinct systems by utilizing PHP and jQuery.
